MasterClass Series Foundation Training in Systems Completion & CSU with API RP I FSC

- *“I would recommend this course to other engineers, technicians, and operators new to commissioning.”*
~ James S, Course attendee, Houston TX, November 2013
- *“I received a much deeper understanding of database systems at a higher level than what I expected.”*
~ Chris S, Course attendee, Houston TX, November 2013
- *“Enjoyed class discussions on commissioning procedures, and commissioning plans. And lunch was great, with a good variety from day to day!”*
~ Rich G, Course attendee, Houston TX, November 2013
- *“This course was very beneficial, the course content was great, and having this group in attendance, all in one room together for discussion was invaluable”*
~ Anon, Course attendee, Houston TX, November 2013
- *“All the course material was very well laid out, and our instructor was very knowledgeable”*
~ Anon, Course attendee, Houston TX, November 2013
- *“Great course I really enjoyed the material and class discussions”*
~ Anon, Course attendee, Houston TX, November 2013
- *“I know it was a mixed audience and this required you to be flexible in the instruction and agenda times. I think you did a great job of recognizing the diversity of experience in the class and adjusted accordingly.”*
- *“I believe the course should be part of any project management training.”*
- *“I learned several things in this course. The most important for me was the emphasis on early introduction of a knowledgeable commissioning manager to a project. If you have a knowledgeable CSU manager they can affect the contract and ensure CSU requirements are embedded in those contracts.”*
- *“If we can get the project world to understand we want a “complete TV” and not just the components, the cost of Operations and the availability of those projects will pay off any perceived excess cost.”*
~ Joe Cunningham, Shell, Singapore, February 2014
- *“It was definitely a course worth attending”*

Testimonials for Training in *MasterClass Series* and *Zenator* References for *Falcon Group* and *Zenator Systems*

- *“I think projects, especially those with complex arrangements and technology such as ours, would benefit from”*
- *“the discussions during the course are very valuable and would not come up otherwise.”*
- *“I believe this provided a good kick start to the commissioning efforts on our project.”*

~ Andrew Pearson, Shell, Singapore, February 2014

- *“Thank you very much for your well organized training and knowledge sharing.”*

~ Manivannan. V, Shell, Singapore, February 2014

- *“I took a lot of positives from the course”*
- *“The benefits of getting the commissioning manager in to the project early became very apparent during the course, this is something we have missed the boat on regarding our current project and are now feeling that lack of foresight with numerous late deliverables.”*

~ Commissioning Manager, Singapore, February 2014

- *“You did well as a speaker! I found the content very interesting and useful.*
- *You put the right focus at the right time.”*
- *“Overall, it was satisfying and I thank you for sharing your knowledge”.*

~ Nur Islam Nur Iskandar, Commissioning Engineer, MMHE, Kuala Lumpur, March 2014

- *“Many thanks to you as my instructor in this event. I really got a lot from the course ... the attendees were great as well with their sharing knowledge and experiences about commissioning.”*
- *“In the class, there’s so much quality knowledge from Alan and it can be implemented in my day to day activity particularly the API recommended practice IFSC and the Completion Pyramid is very useful for me as Commissioning & Operational team in the PHE ONWJ project department.”*
- *“I am glad to join there from the beginning until the end of the course.”*

~ Agus Purbaya, Commissioning & Operational Readiness Manager, Pertamina, Kuala Lumpur, March 2014

- *“I am very glad you were able to deliver the program as planned. It's not about business but the robustness of the package, the passion you have for this, and the willingness to share what you know with others. For me this is the differentiator. That is what makes your workshop better than others.”*

~ Ignatius Nwokorie, Operating Company senior manager responsible for project delivery and for putting 50 Systems Completion and Commissioning Engineers through the course, Nigeria, October 2014

- *“Very well organized course material and the instructor, Alan, was really good with the pace of the course progress.”*

~ Akash Roy, Technical Superintendent, SBM Offshore, Houston, January 2015

- *“Alan is very knowledgeable in the CSU of onshore and offshore facilities.”*
- *“The training provided us with much required info to prepare us for safe commissioning of our new system, step by step approach, planning processes, required resources. Trainer provided best industry practices and project lookbacks. This valuable information gave us the opportunity to improve and re-look into our execution plan.”*

~ Azhar Amin, Maintenance Supervisor, Chevron Singapore, Kuala Lumpur, March 2015

- *“As Commissioning & Start-Up continues to grow recognition in its importance and value, I realized that immersive training classes would be needed to gain a better understanding. Global Falcon offered a MasterClass Foundation course on Commissioning & Start-Up with API RP 1 FSC led by Alan Mills.*
- *To manage my novice understanding, Alan kept ensuring the content was clear and the brainstorming/discussions in the room were relevant to all attendees.*
- *On top of that, the customer service made me feel warm and welcomed. Overall, the training class was intuitive and it was clear that Alan and company had invested a lot of resources in developing the content and facilitation process.*
- *If it is feasible to attend this I highly recommend Falcon Global as it has been integral to my development in this space!”*

~ Aadel Sarfani, CP Supply Chain Lead Vito – Offshore Installation & Commissioning, Shell Exploration & Production Company, Houston, February 2019

Testimonials for Training in *MasterClass Series* and *Zenator* References for Falcon Group and Zenator Systems

- *“MasterClass gave me an understanding of the capabilities of current Completions Management Systems, the role they can play in providing organization and structure for the Completions process, and the value that the good ones like Zenator provide as a tool for assuring complete documentation packages for turnover to Operations.”*

~ Jerry L McAfee, Process Plant Startup Director, Process Technical Services, Houston, February 2019¹

- *“The Masterclass Commissioning & Start-up course met my expectations,*
- *I had more than enough of detailed materials including references and video clips from past commissioning projects.*
- *The one to one review after completion of each Phase module has been very helpful.*
- *I would give this course a 5 star and would highly recommend it to anyone interested.”*

~ Lawrence Imonigie, Lead Commissioning Engineer, Aberdeen, Scotland. May 2019²

¹ Footnote: I was honored to have Jerry McAfee attend the Foundation MasterClass recently in Houston. Jerry teaches what until publication of API RP IFSC was known in the US as the "Bill Tillman method". Bill Tillman is the grand daddy of Systems Completion methodology and with it CSU training, and Jerry took over the role from DuPont's Bill Tillman in the 1980s. It was DuPont and Bill Tillman that gave birth to the concept of progressive Systems Completion and with it, Systemization, Checksheets and Certification. DuPont exported their know-how to their UK technology partner, ICI in the 1970s. British Engineers working in the North Sea industry during the 1970s deployed what was known as the "ICI Method". By the 1980s every major Operator working in the North Sea had adopted the "Bill Tillman method" as their own, without recognizing or crediting its origins. API RP IFSC has helped bring this story full circle and I feel very proud to have had the great Jerry McAfee attend my class.

Zenator Power User Training

I took the Zenator Systems online course in 2019 even though I have done Systems Completion in the past, the training exposed me to a better way of carrying out a lot of task efficiently and accurately irrespective of location whether in the office or at the field or during job walk down.

During my Zenator Software training I discovered how powerful the tools are and how user-friendly the software interfaces are too. My instructor (Alan Mills) was very experienced and knowledgeable as per how to sequence the modules and share past field experiences with real world examples to enhance trainee understanding of the software.

I was also able to use the software during the training sessions and off sessions to increase my proficiency. The limited access granted for the software use made the training worthwhile and cost effective to trainee.

The powerful and robust tools in the software like Zenator Check, Zenator Launch, Zenator Allocator and Zenator Report Plus will greatly improve the project tracking efficiency and accuracy of deliverables of any Project Systems Completion, Static and Dynamic Commissioning, and Start-Up.

The training and software is a must have for anybody in this line of industry to be efficient and I am very grateful for being able to take the course in order to improve my skills in the area of Systems Completion.

Testimonials for Training in *MasterClass Series* and *Zenator* References for Falcon Group and Zenator Systems

Zenator

- *"I am pleased and proud to use PetroPCS-Zenator on Petrofac projects"*
- *"PetroPCS is a compelling solution for our clients - they see it, they like it and they want to use it"*
- *"The use of PetroPCS-Zenator has provided substantial commercial benefit and efficiency in our project delivery"*

~ Mark Denham, Completions Director, Petrofac

- *"Back in 2012, Zenator was selected with lot of questions because project's key people have no past experience with it. Surely, when project approaching its early completion milestones, Zenator has gained thrust as reliable tool in managing project completions of our 185,000 b/d crude oil processing plant. This is not only because the robust system itself, but also consistency from the Zenator's support team who maintain the system. Well done Falcon Global! "*
